

ARB™ Case Diverter

24" and 36" Wide

WHY MCE

- > **Durable**
- > **Versatile**
- > **Quick & Cost-effective**
- > **Made in the U.S.A.**

ABOUT MCE ARB™ CASE DIVERTERS

MCE ARB™ Case Diverters divert packages from 1:2 lanes without interrupting product flow. Typical applications include rejecting product from the production flow on demand and dividing production output between parallel downstream operations. The system requires no hardware mounted above the conveying surface, no overhead structure to interfere with access to products, no change parts, and no mechanical adjustments.

FEATURES

- > Small footprint
- > Low maintenance
- > Mechanical design eliminates complex controls
- > Seamlessly integrate into existing production lines
- > FDA and USDA approved plastic

MCE ARB™ Case Diverter Standard Technical Features

Suitable for use in dry or washdown environments, this ARB™ Case Diverter provides consistent, repeatable package positioning using industry-standard parts.
