

# Draper Z Incline

## Vertical Conveying Solutions

MCE's Draper Z Incline conveyor is made to provide manufacturers with an elevation solution that eliminates changeover time and minimizes production floor footprint. By design, this elevation solution raises and lowers varying shaped products consecutively with no need for time-consuming changeover adjustments. The Draper Z Incline conveyor consists of a lower incline conveyor and an upper "draper" conveyor that gently drapes over the product shape keeping products correctly oriented. The Draper also prevents backsliding of products and reduces tipping which allows for steeper incline angles than conventional incline conveyors.

### FEATURES

- Made at fixed angles of 30, 45, and 60 degrees
- Reduced footprint
- No changeover needed
- Low maintenance
- Simple on-off control
- Accessibility layout for operator and fork truck traffic

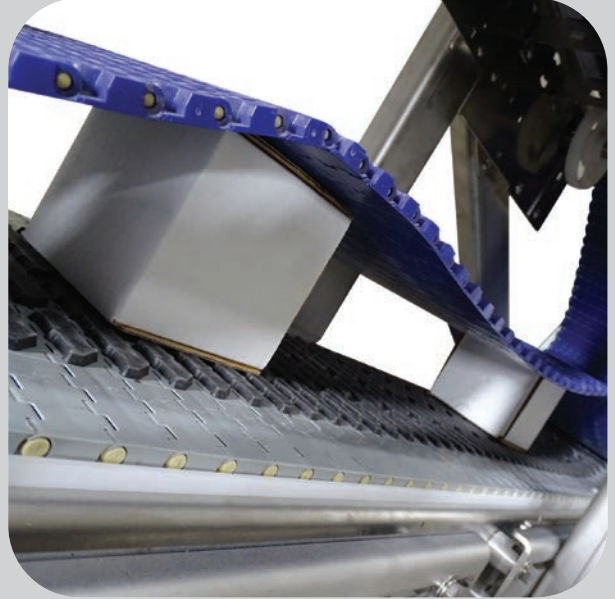

### INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Contract Packaging
- Beverage
- Personal Care
- Pharmaceuticals
- Household Cleaning Products

### APPLICATION TYPES

- Bundles
- Cans
- Cartons
- Cases
- Pouches
- Tapered Cups
- Trays

# Draper Z Incline

## Unique Draper Design Features

- The self-contouring nature of the upper belt allows for a variety of product shapes, sizes, and weights to be moved while maintaining the integrity of orientation during an incline or decline to the next production stage
- Takes advantage of unused vertical space and contributes to a small footprint on the production floor
- Simplifies or eliminates designs around traffic patterns with a reduced overall production line footprint.
