The new patent-pending RAPID-RAIL™ is engineered to simplify changeovers on the packaging line. RAPID-RAIL™ offers a single point, easy-to-use hand adjustment of guide rails to accommodate multiple package sizes on the same piece of equipment. Several points along the conveyor, over a long distance, can be controlled from one location on the line.

With a repeatable system, it’s easy to fine-tune the path as products go through the turn. On a long conveyor line with numerous guard rail brackets, it could take several hours for rail adjustments to changeover to different sizes. With RAPID-RAIL™, all adjustments are made from only a few locations and affect all points along the line.

ABOUT MCE RAPID-RAIL™

The new patent-pending RAPID-RAIL™ is engineered to simplify changeovers on the packaging line. RAPID-RAIL™ offers a single point, easy-to-use hand adjustment of guide rails to accommodate multiple package sizes on the same piece of equipment. Several points along the conveyor, over a long distance, can be controlled from one location on the line.

With a repeatable system, it’s easy to fine-tune the path as products go through the turn. On a long conveyor line with numerous guard rail brackets, it could take several hours for rail adjustments to changeover to different sizes. With RAPID-RAIL™, all adjustments are made from only a few locations and affect all points along the line.

FEATuRES

> HUGE changeover time savings
> Manual or automatic adjustment
> Wash-down compatible
> Change up to 30’ of guide rail from a single point - including curves
MCE RAPID-RAIL™ Standard Technical Features

The new design enables operators to add a motor and control any adjustments right from a conventional control system.

- Horizontal or vertical adjustment systems
- Industry-standard spare parts
- Ships fully assembled
