

RETRACTABLE CONVEYOR

WHY MCE

- > **Durable**
- > **Versatile**
- > **Quick & Cost-effective**
- > **Made in the U.S.A.**

ABOUT RETRACTABLE CONVEYOR

Safe and unrestricted movement throughout the production floor for personnel, fork trucks and other moving equipment. The use of a Retractable Gate conveyor can reduce the overall production line footprint by eliminating the need to design around traffic patterns and promotes a safer environment with employees no longer walking under conveyors when navigating the production floor.

FEATURES

- > Horizontally retracts into itself
- > Provides a standard pass through opening of 30"
- > Adjustable guide rails included
- > Operated by a simple-to-use hand crank

MCE Retractable Conveyor

The Conveyor Retractable Gate is another addition to the MCE family of conveyors and conveying equipment. The MCE family of conveying systems is designed from an unmatched combination of application experience and manufacturing expertise. These systems are engineered with a purpose - to maximize packaging line performance, reduce changeover times and get products from point A to point B efficiently.

Standard Retractable Conveyor typically ships in 15-20 business days.
