Rotary Table
36” and 48” Diameter

WHY MCE
> Heavy-Duty
> Versatile
> Quick & Cost-effective
> Made in the U.S.A.

ABOUT MCE ROTARY TABLES
Rotary tables, also referred to as accumulation tables or unscrambling tables, are designed to support a variety of conveyor system requirements. They are often used with round containers, such as bottles, to accumulate or unscramble bulk, so that they can be discharged in a single file line.

MODULAR FEATURES
> Versatility for many product sizes and shapes
> Clockwise and counter clockwise rotation
> Adjustable speed control
> Easy to clean
> Flexible installation
Rotary tables enable the collation and accumulation of products from conveyor lines and packing areas creating a buffer zone on a low speed line and also providing accumulation at the end of a production line. Ideal for areas that are not large enough or not suitable for an automated system.

> Ideal for hand packing stations or loading tables
> Industry-standard spare parts
> Low maintenance
