

# Zero Tangent Radius Conveyor

## Conveyor Solutions

MCE's Zero Tangent Radius (ZTR) conveyor equipment presents a distinctive solution for material handling within constrained spaces. The standout characteristic of a ZTR conveyor lies in its remarkable capability to navigate tight curves with a zero tangent radius. This means it can execute sharp directional changes without the need for extended straight sections between curves.

The ZTR conveyor's modular design, space-efficient construction, and versatility render it an invaluable asset across a multitude of industries. Its advantages include heightened production efficiency, minimized material damage, and enhanced safety measures.

### FEATURES

- Tight turns
- Compact footprint
- Design flexibility
- Increased production efficiency
- Low maintenance
- Versatile applications

### INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Contract Packaging
- Beverage
- Personal Care
- Pharmaceuticals
- Household Cleaning Products

### APPLICATION TYPES

- Bottles
- Bundles
- Cans
- Cartons
- Cases
- Jars
- Pouches
- Tapered Cups
- Trays

# BECOME A DISTRIBUTOR FOR MCE!

## Build Your Best Conveyor Business

MCE is always looking for the right partners in areas where MCE conveyor systems and equipment products are not available. Our goal is to help conveyor distributors offer quick-ship, efficient conveyor solutions.

### ADVANTAGES WITH MCE

- Broad Product Line
- Industrial Duty Systems and Components
- Quick Shipment
- Commercially Available Parts
- Easy Installation
- Extensive Manufacturing Capabilities
- Quick and personal application reviews with our MCE conveyor experts

We have a talented and dedicated team of conveyor experts with many years of experience who are ready and willing to help take your business to the top. It's our dealer-driven philosophy that separates us from all the others. If you're ready to form your best conveyor business relationship, contact us for more information about becoming an MCE distributor.
