

Virtual Solutions

Keep your system running, avoid costly service trips, and limit visitors to your facility with an Ewon Cosy integrated with your Nercon conveyor controls system. The Ewon Cosy provides easy remote access to industrial devices such as PLCs and HMIs. Remote access availability allows the end-user to receive remote troubleshooting assistance from Nercon in a fraction of the time a service trip

would require. Nercon can supply their expertise remotely and immediately to aid the end-user in optimizing their operation while reducing downtime.

With the Ewon Cosy installed and connected to a Nercon conveyor system the end-user can benefit from:

- **Prompt response when service is required***
- **Lower service costs**
- **Reduced downtime**

IT FEATURES

- Exclusive outbound connection for high security
- Two-factor authentication and connection audit trail
- Only devices connected to the LAN of the Ewon Cosy can be accessed
- Remote access can be controlled (on/off) by end-user with an external key switch

USES

- Troubleshoot programming issues
- Troubleshoot faults
- Implement new product sizes or recipes
- Adding functionality to an already fully operational system
- Optimizing system throughput
- End-user staff remote access

CONNECTION TYPES

- Ethernet
- WiFi

*Purchase agreement needed for Ewon Cosy support

The Ewon Cosy connects to the Internet through one of the available connection protocols. Once The Ewon Cosy connection is established it can be accessed through the Talk2M software remotely. Talk2M is a free software that provides secure industrial connectivity service in the cloud. Talk2M offers a highly reliable, efficient and secure solution to connect to your machines remotely.

The Ewon Cosy switch can be installed into the control panel of an existing conveyor system by the end-user or into a new panel by Nercon. Whether installed ahead of time or by the end-user, Nercon's experienced team will work with the end-user to complete the simple setup once it is installed in the

manufacturing facility. The installation and setup can all be done while the conveyor system continues to operate.

You can rest assured knowing your service needs will be addressed in a fast and cost effective way with Nercon's support via the Ewon Cosy.

Easy to Install and Use

- Quick setup wizard
- Works out-of-the-box with all major PLC/HMI brands and USB enabled devices
- Machine (PLC) can be kept operational during installation

Talk2M

- Firewall friendly with audit and log trails
- Layered security model strengthens defense-in-depth approach
- Unlimited number of machines & users
- Optimized server locations for minimum latency
