

Accumulation Solutions

Nercon's [Flex Flow™ Accumulator](#) provides accumulation, essential to the efficiencies of food and consumer packaged goods manufacturing lines. Our Flex Flow™ Accumulator is equipped with an expandable travel path that senses fluctuations in product flow and responsively changes length to match the variations. Products side transfer at the in-feed and the discharge. At all other corners, product is positively driven around the radius, preventing locking or wedging.

FEATURES

- Consistent product flow reduces downtime
- Smooth side transfers of products
- Allows for multiple in-feed and discharge locations
- Best utilized with odd product shapes

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Produce
- Health & Beauty

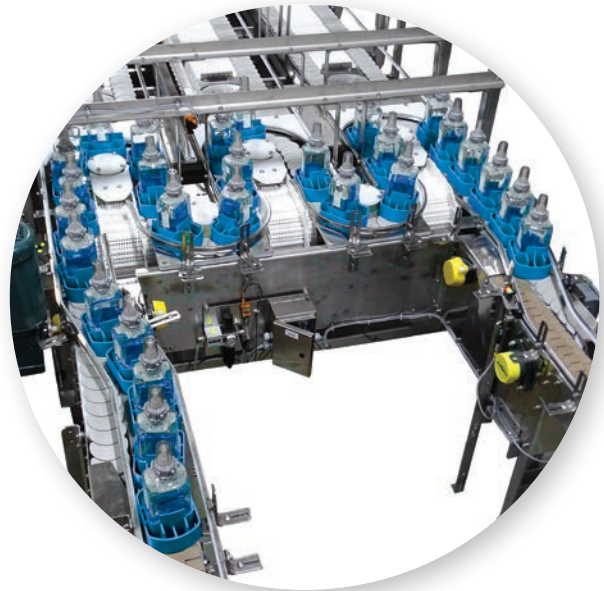

APPLICATION TYPES

- Bottles
- Cans
- Cartons
- Jars
- PET
- Pucks

Unique Design

The Flex Flow™ Accumulator is best suited for irregular product shapes that require gentle handling and low back pressure. It is also used by manufacturers needing exact FIFO (First-In, First-Out) sequence for lot tracking. This in-line accumulation method delivers a constant product flow to downstream equipment where short downtimes are common.
