

Low-Profile Belt Conveyor

Increase Belt Performance

A [low-profile belt conveyor](#) design features a thin belt and a compact frame, allowing the conveyor to fit into tight spaces and be easily integrated into existing production lines. Nercon's low-profile belt conveyor can include adjustable speed controls, various types of belting surfaces to accommodate different product characteristics and a guide track to ensure belt alignment.

Adding a "V" groove to the belt bed and a v-guide to the bottom of the belt, the system is consistently centered, and belt edge-wear is reduced. Belt wandering, miss-tracks and friction will also be minimized reducing inconvenience maintenance and costs.

At a maximum length of 15 feet, if a longer pull section is needed we recommend using Nercon's [flat belt conveyors](#).

FEATURES

- Space-saving design
- Versatility in product handling
- Smooth and quiet operation
- Easy maintenance
- Efficient and consistent movement
- Easy integration
- Cost-effective

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Pet Food & Supplies
- Cheese & Dairy
- Meat & Poultry
- Produce
- Beverage
- Confectionery & Candy
- Frozen Foods
- Health & Beauty
- Household Cleaning Products
- Pharmaceuticals

APPLICATION TYPES

- Bottles
- Boxes
- Bundles
- Cans
- Cartons
- Cases
- Jars
- Pouches
- Tapered Cups 

Standard Belting Options

FDA Blue Longitudinal Rib

- FDA approved
- Suitable for food contact
- Non-marking
- Resistance to product slippage on inclines and declines
- Long wearing

Black PVC

- Durable
- Light and medium duty
- Easily integration with existing systems
- Non-toxic
- Code dating

White Polyurethane Food Grade

- Easily cleaned
- Suitable for food contact
- Does not transfer odor or color contamination to food products
- Belt surface doesn't sink-reducing the possibility of water pooling and bacterial growth
