

Rotary Accumulation Table

10 Business Day Delivery Advantage on 48" ONLY

Accumulation Solutions

Nercon's rotary accumulation tables are designed with the purpose of allowing transfer points control of product flow between production lines, or the manual unloading of products at packing stations. Configured for new or integrated with existing production lines, rotary accumulation tables are ideal for product accumulation or surge backup. An efficient process to balance production rates, a buffer space accumulates product allowing production to continue while downstream product is temporarily stopped.

FEATURES

- Guide rails flip in to make table either right or left handed
- Heavy duty disc supports for true disc edge travel and long life
- Load capacity up to 300 lbs combined weight
- Ability to accommodate various speeds and directions of productions lines

INDUSTRY SEGMENTS

- Snack Food & Bakery
- Packaged Foods
- Beverage
- Confectionery & Candy
- Dairy Food
- Health & Beauty
- Pharmaceuticals

APPLICATION TYPES

- Canisters
- Cans
- Cups
- Glass jars
- Plastic tubs
- PET bottles[®]

Rotary Accumulation Table

Unique Design

Nercon's rotary accumulation table/unscrambler feeds product single-file into an existing line for take away. Our 36" and 48" tables rotate clockwise or counter clockwise and collect, release, regulate speeds, hold or even halt production of products.
